

Corrosion doesn't stand a fighting chance.

**Only Champion Fiberglass conduit
knocks out Corrosion before it starts.
Every environment.
Every installation.
Every time.**

Some materials just don't put up the resistance they should. That's how Corrosion begins his slow-but-steady path toward project destruction - adapting to your worksite environment, slowly wearing away at material lifespans and project budgets.

That's why Champion Fiberglass offers the widest range of Corrosion protection available on the market today. When Champion Fiberglass is on the job, Corrosion is off his game.

SUPERIOR
corrosion resistance

15 TIMES
lighter weight than PVC-coated steel*

FIRST & ONLY
UL Listing with extended support distances

**With Champion Fiberglass,
beating Corrosion is easy.**
Beat all your construction challenges
and get your chance to win prizes in
our **It's So Easy** giveaway.
